### Digital Pregnancy Test

- Beautiful appearance
- Over 99% accuracy from the day of your expected period
- Unmistakable clear result in display screen
- Fast result in just 5 minutes

## Diagnostic instruments

### Blood Glucose Monitoring System

The Extracare series blood glucose monitoring system is designed to measure the blood glucose levels in fresh capillary whole blood samples from fingerstick. The system is suitable for diabetics to monitor their blood glucose at home by themselves and also can be used at clinical sites by healthcare professionals to test the blood glucose levels of patients. It is a self-testing and professional use device for the quantitative determination of blood glucose levels in whole blood. For in vitro diagnostic use only.

Coded strips for more accurate results

24 months long shelf life

Less sample, less pain

Well sealed vial pack

Big screen

Easy to use

Accurate and believable

Multi function settings

400 memories
