

## Roche Hitachi 902 Chemistry Analyzer

The Roche Hitachi 902 supported by Roche Diagnostics is routinely available from Diamond Diagnostics in refurbished condition. All instruments refurbished by Diamond, including the Roche Hitachi 902, are disassembled down to-the-frame then thoroughly cleaned, polished and eventually refinished with a durable 3 part industrial paint that matches the instrument's original color and sheen. During re-assembly components are validated, repaired or replaced as needed followed by full diagnostics, calibration and running controls as a final step. Afterward the instruments are inspected and prepared for international transit. Should you wish to receive more information on the Roche Hitachi 902 Chemistry Analyzer such as pricing, detailed specifications and availability go to [instrumentation](#).

Manufacturer: Roche Diagnostics

Type Chemistry Analyzer

Parameters: 69 analytes

Throughput: 200 samples/hour, 300 w/ise

Method: Spectrophotometric

Open system: Open

W x D x H: 28X28X43 inches / 70X70X108 cm

Weight: 440 lbs / 200 kilos
