

are your asthma patients...

busy?

travelling?

active?

energetic?

Able Spacer fits whichever MDI you choose

Able Spacer is a new small-volume spacer which is compact enough for anyone on the move. This clever design is discreet and has been designed to contain the complete asthma inhaler when not in use.

The Able Spacer will effectively assist and improve inhaler technique and drug delivery to the lungs and will accept all metered dose inhalers (MDI's).

ABLE
SPACER
