

Histology Ralph Glass Knife Maker Model EMS-2

Precision designed, easy to use, reliable knife maker to produce 25.5 mm (1") or 38 mm (1-5/16") wide Ralph glass knives when used with EMS histology grade microtomy glass or any other 5.8 mm to 6.2 mm thick quality glass strips. This glass knife maker will automatically compensate for changes in thickness of the glass strips (typically 5.8 mm to 6.2 mm thick).
