

Kyowa

MODEL SD-2PLQ STEREO MICROSCOPE

The new built-in incident and transmitted-light stand with halogen illuminator:
Get more out of your Kyowa Stereo Microscope

- Powerful 10W halogen lamp for bright, evenly illuminated images
- White light for better images and sharper photomicrographs
- Variable voltage transformer to help you match intensity to application

The SD-2PLQ Stereo microscope is identical to the SD-2PL model, offering the same superb optical quality. However, it has built-in, dual halogen illumination system providing both incident and transmitted light independently or simultaneously.

SD-2PLQ with turret magnification and dual halogen illumination
