Rapid Tests

Teco Diagnostic's rapid tests refer to a variety of card and dipstick tests used to quickly and qualitatively determine the presence of a given substance in a sample. These tests are easily interpreted as positive or negative by the presence or absence of a color band in the test zone. Each test contains a built-in control line for added quality assurance. Rapid tests are useful in the testing of fertility, tumor markers, cardiac markers, infectious diseases, drug of abuse and drug adulteration.

- Inexpensive and easy to use
- High sensitivity and accurate results
- Flexible packaging options available
