

CLASS II

The LabGuard 437 Class II, Type A2 [formally A/B3] Biological Safety Cabinet incorporates all of the LabGuard 425 features and benefits with the addition of one unique feature—an Electronic Control System. The Electronic Control System is a microprocessor module that performs these functions:

- Controls Lights and Duplex Outlets via Solid State Front Touch Panel
- FlowGard – monitor and displays airflow system performance
- Alarm/Set Points for High and Low Alarm
- Controls Blower / Motor with Solid State Regulator
- Remote Contact Outputs for Interaction with HVAC Systems

For a full color brochure, specifications, or featured information on the LabGuard 437, please call, fax or E-mail.

The LabGuard 440 Class II, Type A2 Biological Safety Cabinet incorporates all of the LabGuard 425 features and benefits with the addition of one unique feature—an Electronic Airflow Control System that monitors and controls cabinet functions. The control system is a self-contained microprocessor module that performs the follow functions:

- Monitors, Displays and Controls Interior Down Flow Velocities
- Alarm/Set Points for High and Low Airflow
- Clock Display and Timer Functions
- Control System Automatically Compensates for Filter Loading
- Remote Contact Outputs for Interaction with HVAC Systems
- Complete Diagnostic Functions

For a full color brochure, specifications, or featured information on the LabGuard 440, please call, fax or E-mail.

The LabGuard 425 Class II, Type A2 Biological Safety Cabinet combines performance with quality construction for reliability and value where safety and dependability are not an option. The LabGuard 425 is the best selling Biological Safety Cabinet in the world for many compelling reasons:

- Maximum Personnel, Product Protection
- True Laminar Airflow
- HEPEX™ Zero Leak Airflow System
- 100% Stainless Steel Fully Welded Cabinet Shell
- Configuration Flexibility
- Low Maintenance, Lower Operational Cost
- Ergonomic Design Features
- Large Work Area
- Value
- Internationally Tested
