

## Temperature Data Loggers with LCD, Dickson®

Supplier: Dickson

Model : 61279-952

Ideal for monitoring, recording, and evaluating temperature of critical equipment, computers, HVAC/R systems, incubators, freezers, autoclaves, baths, and cleanrooms. These polycarbonate-encased units feature a removable SD FLASH memory card for one-step data transfer, high/low audible alarm, and storage for up to 32,000 sample points. The large four-digit LCD features 2.3cm ( $\frac{29}{32}$ "") digits with minimum/maximum displays. All units feature high-speed USB 2.0 connectivity for fast data downloads. Units **61279-956** and **61279-958** feature ethernet connectivity for remote downloading capabilities. Wall-mountable.

A memory card reader kit and removeable FLASH memory storage card are available for units **61279-948**, **61280-666**, and **61279-952**. The reader kit includes one USB memory card reader and one 128MB, 1GB FLASH memory card.
